27 CARGO TRACKING PLATFORM

TOTAL

**provides superior services
to the owner of the goods**

TOTAL247 provides complete monitoring and control of cargo for the owner of the goods in 24 living languages of the world for all types of transport models, including Combined shipment, truck shipping, and rail, by entering the cargo travel number in the electronic portal. This information shared in this platform includes the following:

- Shipping method, including shipping, air, truck rail, and Combined shipment
- Shipping advice
- Shipping bill of lading information and containers
- Arrival notice and date of entry at the border
- Clearance line and warehouse receipt
- Customs declaration and transit license information
- Truck and rail information
- Output boundary information
- Receipt of safe delivery of cargo
- Container delivery and demolition cost

In addition to tracking the shipment, the owner of the goods can manage his communication with the sales department of the shipping company electronically and fulfil his requests for ordering new shipments through the secure electronic platform Total247.

Total247 allows you to provide various reports on the status of each shipment instantly.
